Complaint
Detail : My wife requested my assistance with the electronic voting machine in inserting the card and making selections. She also forgot her eye glasses to be able to read clearly. So I was assisting her with selections. First the volunteer came and told me that I can't help her. Second the supervisor (who checked my particulars) came and asked me to step aside. They acted as if helping is not allowed. They didn't ask my wife if she needs help either. I felt I was intimidated because of party affiliation
